Preface

The present volume of RIMS Kôkyûroku Bessatsu contains the proceedings of the RIMS workshop

Geometry of Transformation Groups and Combinatorics

held from June 13 to June 17, 2011. In this workshop, there were 24 talks on recent developments and interactions between geometry of transformation groups and combinatorics. This volume collects 16 papers contributed from the speakers and contains a variety of topics related to topology, geometry and combinatorics. The papers are all refereed. We would like to thank all the participants, the speakers and anonymous referees who made the workshop and this proceedings successful. We also thank the staff of RIMS for their kind and efficient support for the workshop and this proceedings.
